Program-level learning outcomes for HPHY undergraduate major

Undergraduate majors in Human Physiology will be able to:

1. Demonstrate content knowledge and understanding of terminology, concepts, and relationships in human anatomy and physiology.
2. Utilize a broad foundation of anatomical relationships and physiological principles in analysis, application, and synthesis related to human physiology and pathophysiology.
3. Critically evaluate scientific information to help make decisions with respect to personal health, clinical applications, and research in human physiology.
4. Demonstrate life-long learning skills, which include deciding what needs to be learned, articulating a learning plan, and implementing this plan.
5. Communicate effectively, to a variety of audiences, in various modes, using up to date research skills to explain human physiology.
6. Demonstrate knowledge of ethical and professional behavior related to academic integrity, communication with others, and during individual and cooperative work.
